EDUCATION

Vishnu Institute of Technology, Bhimavaram 2022 - 2026
B.Tech in Computer Science and Engineering **CGPA: 7.94**
Relevant Coursework: Database Management System, Object Oriented Programming, Data Structures and Algorithms, Operating System, Computer Networks.

SKILLS

Programming Languages: Python, Java, Javascript, SQL
Libraries & Frameworks: Pandas, NumPy, Flask, NodeJS, ReactJS, TailwindCSS, Flutter, N8N
Databases: Firebase, MySQL, MongoDB
Cloud & Tools: AWS Cloud, GEN AI, Power BI, Figma, GitHub, VS Code
Soft Skills: Excellent Communication, Problem-Solving, Time Management, Adaptability

PROJECT WORK

WASTE CLASSIFIER — FLASK, OpenCV, Anaconda Prompt, VGG16 (June 2025) [LINK](#)
• Developed an intelligent, Flask-based web system for real-time image recognition of municipal solid waste.
• Integrated a deep learning model to automate waste categorization, improving potential recycling efficiency by 25%.
• Applied full-stack principles and data visualization tools, enhancing system usability and user interaction by 40%.
AGRIBRIDGE — FLUTTER, DART, FIREBASE, FAST API (November 2024) [LINK](#)
• Designed and developed an app, facilitating seamless connectivity to Farmers and Consumers using Flutter and Dart. It uses Firebase for authentication.
• Implemented location-based search, increasing user matches by 45% and connecting farmers.
• Reduced transaction time by 30% through streamlined UI/UX design for enhanced user satisfaction.
TRASH TO TRESURE — NODEJS, EXPRESSJS, FIREBASE, FASTAPI (September 2023) [LINK](#)
• Developed a MERN stack application to help with trash maintenance and waste segregation.
• Leveraged existing knowledge and actively sought new learning opportunities in full-stack development.
• Implemented a gamification system, increasing user engagement by 25% for improved waste segregation.
FACE RECOGNITION — PYTHON, OPENCV, MEDIAPIPE (December 2024) [LINK](#)
• Built an app in which users can upload an image to get a prediction using a pre-trained model.
• Achieved a 96% accuracy in model performance by developing and deploying a machine learning model.
• This project mainly uses OpenCV and Mediapipe, optimizing the detection algorithm with 30% faster processing speed compared to baseline implementations.

PROFESSIONAL EXPERIENCE

AI and ML INTERN(SMARTBRIDGE) May 2025 – July 2025
• Applied core AI/ML concepts to develop practical solutions during a 2-month virtual internship.
• Built foundational machine learning models and performed data analysis, enhancing project outcomes.
• Collaborated on AI-driven projects, integrating real-world datasets to solve domain-specific problems.
ML ENGINEER INTERN(SWECHA) JAN 2024 - APR 2024
• Worked as an ML Engineer Intern at Swecha, focusing on Natural Language Processing (NLP) and Language Model development.
• Developed NLP models for text classification, improving accuracy by 18% over baseline models.
• Collaborated with 2+ research teams to refine language models for regional language processing.

CERTIFICATES

• **Programming in Python** (Harvard University) [LINK](#)
• **Introduction to AI and Prompt Engineering** (IBM) [LINK](#)
• **Smart India Hackathon** [LINK](#)
• Qualified for the Smart India Hackathon (SIH) 2024 finals at the college level.
